

BRAILLE SIGNS

Made from polycarbonate this unique multi layer encapsulated Braille sign is durable and vandal resistant. All graphics and text are sub-surface and cannot be picked off, scratched or tampered with. Graphics and text also resist fading, making them ideal for indoor or outdoor applications.

Braille signs have raised pictograms and letters with soft-shouldered edges to protect fingertips.

Suitable for high-traffic areas, these signs can easily be cleaned with disinfectants or cleaners keeping them hygienically clean. Sprayed on graffiti can be removed with ease with citrus-based cleaners without damage to sign surface. Each sign comes with 3M[®] self-adhesive backing. It is recommended not to place sign directly onto the wall. We suggested you place either onto a material backing such as polypropylene then use double sided tape to apply to walls or in a framing system. Custom signs available on request. Call your local distributor for a prompt quote.
